AB An aerated composition comprising, in a physiologically acceptable medium, an oily phase dispersed in an aqueous phase, characterized in that it contains air or inert gas in a sufficient amount to have a relative density ranging from 0.2 to 0.8 and in that it comprises at least one amphiphilic polymer and at least one anionic surfactant. The composition exhibits a very fine texture and good cosmetic properties, while remaining very stable over time. In particular, it can constitute a cosmetic composition intended especially for treating and/or cleansing  
the skin, including the scalp, nails and/or hair and for making up the skin.

AB The invention concerns cosmetic compns. contg. as a thickening agent. e.g., at least a nonanionic associative polyurethane and an anionic polymer comprising a fatty chain monomer unit. Thus, a cosmetic gel contained Acrysol-46 (hexamethylene diisocyanate-PEG copolymer with Me and octadecyl end-groups) 2, Acrylidone-

LM (acrylic acid-lauryl methacrylate-vinylpyrrolidone copolymer)  
1, 2-amino-2-methyl-1-propanol qs and perfume, dye, preservative and  
water

to 100 g.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

AB A premoistened wiper having high initial wet strength in a wetting liquid, and lower wet strength when immersed in substantially neutral water to allow for flushability. The wiper includes a nonwoven web of fibrous material which is bonded together by a polymeric adhesive binder, with the bonded web being moistened until the time of use by a wetting liquid having an acid pH level which is safe for external use on

the human body. The binder is composed of a material which is highly adhesive in an acid pH liquid to bind the fibers of the web together, and which is further resistant to weakening over the relatively long periods of shelf life of the wiper. However, the binder loses its binding strength in substantially neutral or alkaline flush water to allow for flushability. The bonded wiper is maintained with wetting liquid thereon within a moisture sealed container until the time of use, and readily loses strength and disintegrates when disposed of in the substantially neutral water of a sewer system.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.
